Radiation protection consultancy

We help you to be compliant, while you can focus on your business

Looking for expertise?

Does your company use X-ray equipment or radioactive sources? Are you comfortable with legal compliance? Do you want to give your employees and the environment the best radiation protection? **Pleased to meet you!**

Our radiation protection team has many years of experience in tackling all legal requirements. We support industrial companies, hospitals and clinics with all aspects necessary to be compliant with Dutch / European legislation.

You and your workers can feel assured and secured, so your employees can work responsibly and safely with radiation.

Our services

Identify your wishes and needs, including:

- Manage your permits, licenses and notifications
- Deliver the mandatory registered radiation protection expert (according to Dutch legislation)
- Workspace risk assessment
- Regulatory gap analysis

Establish a radiation protection program, including:

- Procedures and instructions
- Awareness training
- Inspection program

Monitor results by means of:

- Compliance audits & workplace inspections

“Philips Innovation Services is a great partner who help us with all aspects of radiation protection. We value the personal contact and the flexibility needed to respond to changes in a dynamic organization like Star-SHL.”

Sjan de Weert

Team lead functional, prenatal and imaging diagnostics
Star-SHL Medical Diagnostic Center
